

# IRM Africa Risk Leaders Conference

A Decade of  
Discovery & Disruption

6<sup>th</sup> November 2019 | Villa Rosa Kempinski, Nairobi

## About the event

The IRM Africa Risk Leaders conference aims to highlight key issues facing the risk management profession including technological change and disruption, innovation, climate change, big data, geopolitical volatility; culture and behaviour; environmental and social risk and professional practice.

We will cover the real risks issues boards face today as well as how boards ought to approach their governance and risk management responsibilities in a world of increased volatility of the external environment. We will discuss what can be done to help organisations instil the behaviours at all levels that will meet the needs of stakeholders and enhance reputation.

This year's Risk Leaders conference will focus on some of the cutting edge thinking that is emerging across the world to address these big issues.
